Title: FUNCTION/SERVICE BASED DATA EXPORT

ELECTION IN RESPONSE TO RESTRICTION

Bellevue, Washington 98004

September 22, 2004

TO THE DIRECTOR OF THE PATENT AND TRADEMARK OFFICE:

The following is response to the Office Action dated April 27, 2004, in which the Examiner issued a Restriction in the above-identified application. Specifically, the Examiner indicated that the application is restricted to one of two groups of claims. Group I includes Claims 1 – 18 and 30 – 49, wherein the Examiner indicates that independent Claim 1 is directed to “a method of operation for determining cross application function/service classifications of exportable data of an application,” while independent Claim 30 “is claiming the same with a storage media and apparatus instead of a method.” The Examiner further indicates that “all these claims are drawn to manipulating data structure, classified in class 707, subclass 101.” Group II includes Claims 19 – 29, 50 – 59, and 60 – 64, wherein the Examiner indicates that independent Claims 19 and 41 are “claiming for a method of retrieving plurality of data publication statements of an application and exporting data,” and that independent Claims 50 and 60 “are claiming the same concept with a storage media and apparatus instead of a method. The Examiner further notes that “all these claims are drawn to query processing, classified in class 707, subclass 3.”

The Examiner has determined that the inventions of the two Groups of claims are distinct, each from the other because “the respective inventions have a separate utility as in a system not having the others,” and because the inventions “have acquired a separate status in the art as shown by their different classification.”
